

ANDO™ | Sliding Door Lock

Single Point Surface Mounted Sliding Door Lock

Key Features

- Sleek, minimalist handle design in keeping with ANDO™ hardware styling.
- Latch and deadlock all in one standard model offering flexible security options.
- Polesium™ internal handle, stainless steel external handle offer high resistance to corrosion in aggressive environments such as sea fronts without compromising security.
- Symmetrical handle design. An important feature with four lite doors where locks meet and can be used for both left and right handed applications.
- Can be keyed alike to other Ando™ window and door locks.
- Available in a range of standard and special powdercoat finishes to match your door.

ANDO™ Sliding Door lock can be supplied in a range of standard and special powder coat finishes to match the door framing.

The outer pull is powder coated over stainless steel for improved security and longevity.

The ANDO™ lock keeper is chrome plated zinc die cast with colour matched cover. The keeper is adjustable up, down and sideways.
